

THE LUXORA COLLECTIVE

Market Blueprint™

Prepared For:

Aesthetics Renewal and Beyond Medspa

Cinnaminson Location

1701 Wynwood Dr, Cinnaminson, NJ 08077

Alexandra Huertas | Aesthetic Director

Industry Medical Aesthetics / MedSpa	Primary Market Cinnaminson, NJ & Surrounding Area	Date Prepared May 13, 2026
--	---	--------------------------------------

We do not guess. We assess.

What This Document Is

This Market Blueprint is a strategic market assessment designed to define what growth is realistically possible within the specific market conditions of Aesthetics Renewal and Beyond Medspa at the Cinnaminson, NJ location.

THIS DOCUMENT IS NOT:

- Not a proposal
- Not a performance forecast
- Not a guarantee of results

Why This Matters

This is a more established location (August 2024) with proven revenue of \$400,000 annually and a growing trend. The Blueprint exists to define the next phase of growth - scaling from \$50-100K/month toward the \$70K/month 90-day target and \$100K/month at 12 months.

Marketing performance is governed by:

- Audience size and demographic concentration
- Competitive density within the service radius
- Ad market pressure and CPM environment
- Budget sufficiency relative to market size and growth goals

LUXORA PRINCIPLE

We do not guess. We assess.

This Blueprint defines the environment in which success is possible - not a map to guaranteed revenue, but a map of constraints and opportunities.

Industry Classification

Industry: Medical Aesthetics / MedSpa
Practice Type: Multi-provider, doctor-injector led, wellness & regenerative focus
Established: August 1, 2024 (Established, Growing Location)
Number of Locations: 2 (Cinnaminson is the anchor location)
Website: <https://LASERMEDISPAS.COM>

Primary Service Area

Address: 1701 Wynwood Dr, Cinnaminson, NJ 08077
Market Type: Suburban - Philadelphia Metro Adjacent
Population Concentration: Moderate-High - Burlington County suburban corridor

Cinnaminson, NJ sits in Burlington County directly across the Delaware River from Philadelphia. This location benefits from proximity to the Philadelphia metro population base while serving a suburban market with above-average income demographics. The location draws from multiple surrounding towns including Moorestown, Riverton, Palmyra, and Cherry Hill.

Geographic Definition Determines:

Factor	Market Implication
Audience Size	Larger than Medford - denser suburban/metro corridor
Competition Volume	Moderate-High - more providers near Philadelphia metro
Cost to Acquire Attention	Mid-range CPMs - suburban NJ near major metro
Scalability Limits	Higher ceiling than Medford - metro adjacency helps

PAGE 3 - MARKET SIZE & DEMOGRAPHIC OVERVIEW

Total Market Data (Cinnaminson, NJ + 15-Mile Radius)

Demographic Indicator	Estimated Value
Total Population (defined area)	~320,000-380,000
Estimated Households	~120,000-145,000
Median Household Income	~\$85,000-\$105,000
Female Population, Age 25-54	~60,000-75,000
Female Population, Age 35-64	~65,000-80,000
Male Population, Age 30-60	~55,000-70,000
Education Level (Bachelor's+)	~40%
Homeownership Rate	~72%

Ideal Client Profile (As Defined by Practice)

Per Alexandra Huertas, the ideal client for the Cinnaminson location is:

- Age 30-60, upper middle class, men and women
- Interested in anti-aging using both services for inner health and external issues
- Seeking educated professional providers offering FDA-approved treatments and holistic options
- Target attract segment: men and women, late 20s-45
- Profile: transformative, holistic, radiant results

MARKET IMPLICATION SUMMARY

This data establishes the upper bounds of demand for aesthetic services in this market.

The dual-gender focus (men and women) is a meaningful differentiator - most medspas skew heavily female.

The regenerative medicine and doctor-injector positioning opens access to a higher-income, health-conscious segment.

This does not predict revenue - it defines capacity.

Primary Aesthetic Buyer Profiles Identified

Service Category	Current Role
Laser Services	Co2, IPL, Pico, 1064, Alex - 30% of current revenue. Core offering.
Injectables	Doctor-led injections - 30% of current revenue. Strong differentiator.
Weight Loss	40% of current revenue. High demand, recurring revenue potential.
Body Contouring	Emsculpt Neo, Bodytite, Accutite - growth target.
Skin & Face Tech	Microneedling (Morpheus8, Virtue RF, Skinpen), Hydrafacial - expansion.
Laser Hair Removal	Pico Laser (Melasma, Tattoo Removal) - additional revenue stream.

Growth Services to Promote

Alexandra identified the following as priority services to grow and promote:

- Hydrafacial - entry point acquisition service
- Microneedling - Morpheus8, Virtue RF, Skinpen
- Pico Laser - Melasma and Tattoo Removal
- Accutite and BodyTite - body contouring upgrade

KEY OPPORTUNITY

This location has a significantly more mature and diversified service menu than the Medford location.

Weight loss at 40% of revenue is a powerful retention and upsell mechanism - these clients return regularly.

Doctor-led injectables are a premium differentiator that commands higher prices and builds trust.

The equipment list is extensive: Co2, IPL, Pico, 1064, Alex, Morpheus8, Virtue RF, Skinpen, Bodytite, Accutite, Facetite, Omniwave, Hydrafacial, Emsculpt Neo, Laser hair removal.

Equipment utilization is currently 30-50% - significant revenue upside without new capital investment.

Market Context

The Cinnaminson/Burlington County corridor near the Philadelphia metro has a more active competitive landscape than the Medford market. However, the practice's doctor-led injector model and regenerative medicine positioning creates clear separation from standard medspa competitors.

Competitive Mix in Market

- Injector-led practices - active in surrounding towns
- Corporate or franchise medspa groups - increasing presence near Philadelphia metro
- Weight loss clinics - competitive overlap on weight loss services
- Dermatology practices offering aesthetics - clinical credibility competitors
- Price-driven discount providers - present but misaligned with this practice's positioning

Market Saturation Indicator: Moderate

The Cinnaminson area has more competition than Medford but is not oversaturated. The doctor-injector model and regenerative medicine offerings create a meaningful moat against standard medspa competitors. The Philadelphia metro adjacency brings competitive pressure from Cherry Hill and Moorestown providers.

Differentiation Claimed by Practice

WHAT SETS THIS LOCATION APART:

- Doctors as injectors - a significant credibility and trust differentiator
- Regenerative medicine options - appeals to health-conscious, longevity-focused clients
- Broad equipment inventory - can serve nearly any aesthetic need under one roof
- Dual-gender positioning - captures male market that most medspas ignore
- Brand identity: Transformative, Holistic, Radiant
- Known for: Educated professional providers, FDA-approved treatments, holistic options

Current Advertising Activity in Market

Active Advertisers Identified: Moderate density - more than Medford market

Primary Platforms Active: Facebook/Instagram, Google

Observed Offer Types in Market

- Discount-based promotions and new patient specials
- Weight loss program advertising - high volume in this market
- Injectable specials (Botox/filler pricing wars)
- Laser treatment packages
- Membership and consultation-driven offers

Current Spend Profile - Cinnaminson Location

Channel	Status
Total Monthly Marketing Spend	\$6,000/month
Paid Ads (Facebook/Instagram)	Active
Paid Ads (Google)	Active
Social Media Management	Active
SEO	Active
Email Marketing	Active
Print/Direct Mail	Active
Current Agencies	Vocal AI, 7 Figures, Pinpoint (AI for site, leads, calls, ad campaigns, SEO)
Creative Assets	None ready - Luxora to assist in creation

AD MARKET IMPLICATION

At \$6,000/month this practice is spending competitively for this market.

The concern flagged: do not go over budget as other ads are already running.

This signals a consolidation opportunity - multiple vendors with overlapping functions can create waste.

A unified strategy under Luxora's direction should improve efficiency without increasing total spend.

High competition for weight loss and injectable keywords will require strong creative differentiation.

Market Trust Signal Assessment

As an established location since August 2024 with \$400K annual revenue and a growing trend, this practice has more trust infrastructure than a new location - but has identified specific gaps to close.

Trust Signal	Current Status
Review Volume	Established - building since Aug 2024, review count growing
Website	LASERMEDISPAS.COM - active; booking clarity and friction TBD
Social Presence	Active Instagram/Facebook
Doctor-Led Positioning	Strong differentiator - not fully leveraged in advertising yet
Educational Content	Opportunity - not yet established as authority content
Creative Assets	Currently none ready - Luxora to assist in creation
Membership/Retention	Opportunity - weight loss clients are natural retention candidates

Trust Gap Opportunities Identified

- Doctor-injector content series - leads with credibility, not price
- Before/after content across lasers, injectables, and weight loss
- Educational video content - FDA-approved treatments, regenerative medicine
- Male-focused content and testimonials - capture underserved market
- Weight loss transformation content - highest-retention service, highest social proof potential
- Holistic/regenerative medicine positioning content to attract longevity-minded clients

STRATEGIC NOTE

This location has a trust foundation that the Medford location is still building.
The biggest authority gap is not reviews or website - it is content that showcases the doctor-led, regenerative medicine differentiation.
Competitors are advertising price. This practice should be advertising expertise and outcomes.
That positioning shift is the highest-leverage creative move available.

Key Market Truth

Cinnaminson's proximity to the Philadelphia metro creates a larger addressable audience than Medford - but also more competitive ad pressure. The favorable factor is a genuinely differentiated practice (doctor injectors, regenerative medicine, broad equipment) that can command attention without competing on price.

Market Variable	Estimate
Addressable Aesthetic Audience (15mi)	~60,000-80,000 women, age 25-64
Male Aesthetic Audience (15mi)	~15,000-25,000 men, age 25-60
Qualified Buyer Segment (income filter)	~40,000-55,000 estimated
Active In-Market at Any Given Time	~5-10% = 2,000-5,500 per month
Facebook/Instagram CPM Estimate	\$12-\$22 (suburban NJ near Philadelphia)
Google Search CPM Estimate	\$20-\$45 (medspa/weight loss/injectable terms)

What This Means Operationally

- Larger audience than Medford = more scale potential at same budget efficiency
- Weight loss advertising competes with high-volume national brands - creative quality critical
- Doctor-injector angle lowers price sensitivity - leads from this message convert at higher value
- Male market is largely untapped by competitors - first-mover advantage available
- Retargeting across laser + injectable + weight loss creates multi-service upsell funnel

STRUCTURAL REALITY

This dynamic is structural, not negotiable.

The good news: this practice's differentiation (doctors, regenerative medicine, full equipment suite) is genuinely harder to replicate than a discount offer.

The risk: if advertising continues to lead with price or generic service names, the differentiation advantage is invisible to the market.

Recommendation: Lead advertising with the doctor-led and regenerative positioning to separate from commodity competitors.

PAGE 9 - PAID MEDIA FORECAST BENCHMARKS

Lead Generation & Conversion Baseline (Current)

Metric	Current Performance
Current Monthly Leads (Inquiries)	~50/month
Lead-to-Booked Appointment Rate	20-40%
Booked Appointment Show Rate	85%+
Appointment-to-Paying Client Rate	50-70%
Average First Transaction Value	\$600
Average Client Lifetime Value	\$3,000-\$5,000
Average Client Return Frequency	2-3 times
Revenue Trend (6-12 months)	Growing steadily
Annual Revenue	\$400,000

Budget Scenario Benchmarks

These figures are directional benchmarks used to frame expectations prior to campaign launch. They are not performance promises. Calibrated to Cinnaminson market size and current performance baseline.

	GOOD	BETTER	BEST
Purpose	Testing & Stabilization	Consistency & Optimization	Growth & Scale
Monthly Ad Spend	\$2,000-\$3,500	\$4,000-\$6,000	\$6,500-\$10,000
Estimated Monthly Reach	12,000-25,000	30,000-60,000	65,000-120,000
Est. Lead Volume/Mo	12-25 leads	30-55 leads	60-100+ leads
Outcome	Data acquisition & baseline	Predictable lead flow	Margin protection & scale

IMPORTANT NOTE

At a \$600 average first transaction and \$3,000-\$5,000 LTV, this location has significantly stronger unit economics than Medford.

At mid-range spend with 30-55 leads/month and a 50-70% close rate, this generates 8-22 new paying clients monthly.

At \$600 average transaction, that is \$4,800-\$13,200 in new client revenue per month from paid alone - before repeat visits.

Weight loss clients returning 2-3+ times dramatically amplifies the LTV math.

PAGE 10 - GOOD / BETTER / BEST MARKET SCENARIOS

These tiers reflect market constraints and operational capacity - not optional preferences. They are calibrated to Cinnaminson, NJ market conditions and this location's current stage and revenue base.

GOOD - TESTING & STABILIZATION

Purpose: Data acquisition, new campaign structure, baseline performance

Monthly Ad Spend: \$2,000-\$3,500 (portion of current \$6,000 budget)

Outcome: 12-25 qualified leads/month, audience building, creative testing

Best For: Immediate phase - consolidating vendor spend and establishing Luxora campaign foundation

Key Risk: Budget fragmentation across multiple vendors reduces efficiency of each channel

BETTER - CONSISTENCY & OPTIMIZATION

Purpose: Predictable lead flow and cost-per-lead efficiency

Monthly Ad Spend: \$4,000-\$6,000 (current budget level, consolidated)

Outcome: 30-55 leads/month, retargeting active, doctor-led content performing

Best For: Once creative assets are built and campaign structure is optimized (Month 2-3)

Key Risk: EMR access issue for bookings must be resolved to maximize conversion of leads

BEST - GROWTH & SCALE

Purpose: Market leadership, new device promotion, \$100K/month revenue target

Monthly Ad Spend: \$6,500-\$10,000 (incremental increase from current base)

Outcome: 60-100+ leads/month, multi-service funnels active, male market captured

Best For: When creative library is built, EMR is resolved, team stability improves

Key Risk: Short-staffed team (7 members, some turnover) must scale capacity to handle demand growth

Marketing Performance Sequence

Marketing performance follows a fixed sequence. This cannot be shortcut or compressed.

Stage	What Happens
1. Spend Creates Data	Ad dollars in motion generate audience signals, click patterns, and initial lead data.
2. Data Enables Optimization	With sufficient data (typically 30-60 days), campaigns are refined for efficiency.
3. Optimization Drives Results	Refined campaigns deliver predictable, scalable lead volume at target cost.

Current Operational Constraints to Note

- EMR access issue currently limiting booking conversion - being resolved, priority item
- Team of 7 with some turnover (3-4 departures) - short-staffed, capacity constraint
- Front desk close rate rated Good (40-60%) - improvement opportunity
- Front desk challenge: EMR access, getting resolved to book clients
- Equipment utilization at 30-50% - capacity exists, demand is the constraint
- No creative assets ready - content creation support needed to activate new device campaigns
- Primary concern: grow without exceeding monthly budget

EXPECTATION SETTING

This location is growing steadily and has the unit economics to hit its targets.

Month 1-2: Consolidate spend, build creative assets, resolve EMR issue, establish campaign baseline.

Month 3-4: Optimization begins. Cost per lead should decrease. Doctor-led content goes live.

Month 5-6: If team capacity is addressed, scale to BETTER/BEST scenarios.

90-Day Revenue Goal: \$70,000/month - achievable with optimized lead flow and EMR fix.

12-Month Revenue Goal: \$100,000/month - achievable with full creative library and team stability.

Based on This Market Assessment

The following strategic priorities emerge for the Cinnaminson location:

Strategic Priority	Rationale
Lead with Doctor-Led Positioning	This is the strongest differentiator in the market. Advertising that leads with 'doctor injectors' and 'regenerative medicine' separates from every price-based competitor.
Resolve EMR Access Now	If leads cannot be booked efficiently, ad spend is partially wasted. This is the highest-priority operational fix.
Activate New Device Campaigns	90-day goal is to grow business for all new devices purchased. Dedicated campaigns per device (Morpheus8, Pico, Accutite/BodyTite) will drive awareness and trial.
Capture the Male Market	Late 20s-45 men are a stated target and an underserved segment. A dedicated male-focused ad creative and landing experience can open a new revenue stream.
Consolidate Vendor Spend	Multiple agencies (Vocal AI, 7 Figures, Pinpoint) plus Luxora creates overlap. Rationalizing roles will improve ROI without increasing total budget.
Build the Creative Library	No creative assets is the single biggest limiting factor for new device promotion. Before/after, video, and doctor content unlocks the campaigns that drive premium-ticket bookings.

Revenue Path to \$70K/Month in 90 Days

- Current annual revenue: \$400,000 (approx. \$33,000/month average)
- Target in 90 days: \$70,000/month - requires roughly doubling current monthly pace
- Primary levers: new device activation campaigns + injectable/laser upsell to existing weight loss clients
- Weight loss clients (40% of revenue) are the highest-LTV retention opportunity - referral and upsell programs here are direct revenue
- At \$600 average transaction, need approximately 117 transactions/month to hit \$70K

This Market Blueprint was prepared for Aesthetics Renewal and Beyond Medspa - Cinnaminson Location and delivered as a strategic briefing to Alexandra Huertas, Aesthetic Director.

This Blueprint's Purpose

- Align expectations between market reality and growth goals
- Establish the competitive and demographic context for all future campaign decisions
- Guide informed decision-making on ad spend, offer structure, and operational priorities
- Define the environment in which success is possible - not a prediction, but a map

FINAL ASSESSMENT

Market: Favorable. Larger addressable audience than Medford, moderate competition, metro adjacency advantage.

Practice: Established, growing, with strong unit economics (\$600 avg transaction, \$3K-\$5K LTV).

Biggest Near-Term Lever: New device activation campaigns + doctor-led creative differentiation.

Biggest Near-Term Risk: EMR booking friction and team capacity limiting conversion of increased lead volume.

Budget Concern Addressed: Strategy focuses on consolidating current \$6,000/month spend for efficiency - not requiring more budget to start.

Recommendation: Consolidate vendor spend, build creative assets, resolve EMR, activate device-specific campaigns - then scale as operations allow.

It is not a prediction of results. It is a map of constraints and opportunities.

THE LUXORA COLLECTIVE

We do not guess. We assess.
